Help for Women.

We want to say earnestly and positively and emphatically that there is neither need nor necessity for female troubles. Nine cases in ten can be cured certainly and surely and permanently. Physicians may think and say that many cases of leucorrheea (or "whites"), falling of the womb, profuse, painful or suppressed menstruation are chronic and cannot be cured, but physicians make mistakes. They don't always think right. They do the best they can, but Nature can do better.

Doctors often tell women that local examinations and treatment are absolutely necessary, but in a great many cases they are not. Nature never intended that women should submit to such abhorrent treatment. The very thought of it is unnatural.

Most female troubles can be traced either to doubt or ignorance. Doubt comes from the failure of doctors to cure. Ignorance from the use of the wrong medicine.

It gives strength and health to the coming baby by giving strength and health to the coming mother. It safely guides the mature woman over the dan-
